

# 2020 national rare earth solar container

## Overview

---

XLSX format) 2020 update for USGS Data Series 140 - Historical Statistics for Mineral and Material Commodities in the United States. Rare earth elements (REE), a group of 17 elements included in the list of critical minerals pursuant to Executive Order 13817, are used in many components and products in various sectors. In 2020, primary mining operations in Mountain Pass, CA, combined with byproduct production in Oferman, GA, produced a total of 39,000 metric tons (t) of rare-earth-oxide (reO) equivalent in mineral concentrates (table 1).
