

23 years of solar container projects

Overview

The solar container market is expected to grow rapidly in the coming years. This surge is driven by a growing need for portable off-grid power in remote and. 7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. The global shift toward renewable energy integration and energy independence is accelerating demand for photovoltaic (PV) containers. Industries ranging from mining and telecommunications to disaster relief now prioritize backup power solutions that combine mobility with grid independence.
