

Basseterre geothermal solar container

Overview

The station uses bifacial solar modules that capture sunlight on both sides—like a sandwich absorbing energy from above and reflected rays below. Paired with AI-driven predictive analytics, the system anticipates weather changes and adjusts energy distribution 24/7. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. Colombia's first grid-scale battery energy storage system (BESS) came online in 2023 near Medellín - a 20MW/40MWh behemoth that's essentially a giant Tesla Powerwall for the national grid.
