

# Cairo solar container battery industry development center

## Overview

---

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased penetration of. The design is compact, allowing overall transportation, easy installation and debugging, and low construction cost; The liquid cooling system ensures higher system efficiency and cell cycling up to 10,000 cycles. Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. Especially in remote areas it can guarantee a stable energy supply or support by 25% through peak solar containers proudly manufactured. Cairo battery energy storage containers designed to meet the diverse needs of base station energy storage.
