

# Capacity requirements for solar container frequency regulation

## Overview

---

In this article, we propose a novel decentralized frequency regulation method for renewable energy-dominated power systems. Research article Optimal configuration of hydrogen storage capacity of hybrid microgrid considering peak regulation and frequency modulation requirements Dan Yu, Yuhan Guo, Weijun a?

| This method breaks through the traditional optimization framework and adopts a double-layer optimization model. Firstly, the cost issue is an important consideration, especially in FR applications that.
