

China power construction japan solar container project

Overview

Japan has launched an investigation into Chinese-made solar panels over fears they may contain hidden communication devices capable of disrupting the nation's power grid - a security concern that analysts say could accelerate a shift towards domestic clean-energy technology. POWERCHINA's core competitiveness of industrial management, development planning, survey and design, EPC contracting and project investment, operation and maintenance in the solar power industry is the backbone of the development of China's solar power. Shanghai Electric Power, headquartered in China, has acquired a mega-solar project in Iwakuni, Yamaguchi Prefecture. Not only was the project originally supposed to be run by a Japanese company, but it has. 9 MW-capacity Kurokawa solar power plant in Japan has already achieved the Commercial Operation Date (COD) as.
