

China's solar container battery exports grow

Overview

After last year's severe overcapacity slump, Chinese battery firms secured about 200 overseas orders totaling 186 GWh in H1 2025. Beijing's 250 billion yuan (\$32 billion) investment plan aims to add 180 GW of new energy storage capacity by 2027. India's demand for solar cells sees exports of the product from China increase by over 70% in the first half of 2025, doubling to over 40% of all solar products as solar panel exports stagnate. Large battery customers include Germany's top car makers such as Volkswagen and BMW as well as grid operators and utilities that are building out the country's BESS. Walk into any port city in China today, and you'll see it — containers stacked high, cranes swinging above a sea of goods, and among them, one product that's quietly redefining global energy: lithium-ion batteries.

China's solar container battery exports grow

Tracking China's clean energy export dominance in seven charts

Due to trade tensions with the United States and Europe, the pace of China's export growth to Europe and North America has slowed notably from earlier this decade.

China Energy Transition Review 2025 , Ember

With wind and solar generation growing exponentially and challenging fossil generation, and with the wider economy electrifying fast, China's energy-related fossil fuel demand is likely soon to begin falling.

China to abolish solar export tax rebates in April

China will scrap value-added tax export rebates for PV products from April 1, 2026, while cutting battery rebates ahead of a full phaseout, raising export costs for manufacturers and potentially

China's Lithium-ion Battery Exports Surge 47% to 78 GWh

China's lithium-ion battery exports surged 47% to 78 GWh through October 2025, driven by a 102% jump in stationary storage shipments and a 12% rise in EV battery exports. Europe ...

China to End Export Tax Rebates for Solar, Battery Products

China extended its long-standing export tax rebate policy to cover solar products in 2013 to support the PV industry's early growth. But as the industry has matured and competition has ...

China's Battery Giants Flood Overseas Markets As Exports Surge 220%

Currently, Chinese solar manufacturers have installed ~80% of overseas capacity including solar wafers, solar cells and modules in Southeast Asia.

China's Battery Export Boom in 2025: Key Trends and Insights

During the first nine months of 2025, China's battery and BESS exports surged by 24%, marking the fastest growth rate in recent years. This expansion pushed total export revenues to \$60 ...

China solar cell exports grow 73% in 2025

Cells and wafers now make up over 40% of China's solar product exports in the first half of 2025. Panel exports are stagnating due to stockpile drawdowns and slowing installations in ...

China Cancels PV Module Export Tax Rebates April 2026 , Analysis

China eliminates solar export tax rebates effective April 1, 2026. Module prices forecast to rise 10-15%. Get the complete analysis and pricing outlook.

China Green Trade Report 2023 , Griffith Asia Insights

JING ZHANG AND CHRISTOPH NEDOPIL , 35-MINUTE READ , DOWNLOAD PDF Key findings China's exports of the 'New Three'--solar photovoltaic (PV), lithium-ion The China Green ...

China to scrap VAT export rebates for solar products from April 2026

China will scrap VAT export rebates on photovoltaic exports from April 2026 and cut battery rebates before ending them in 2027, the finance ministry said.

China Battery Exports: China's Battery Exports Reach Unprecedented

China Battery Exports: China's battery exports soar by 24% in 2025, surpassing \$60 billion, driven by global demand and expanding markets in Europe, the US, and Latin America.

Maguire: China's battery exports are at new heights.

China's exports have reached a new record for 2025. They have risen by 24% over the previous year in the first nine months of the year. Ember, an energy think tank, shows that batteries ...

China's 1 trillion yuan EV, solar and battery exports ...

China's 1 trillion yuan (US\$139 billion) exports of electric vehicles, lithium batteries and solar cells could face a new round of challenges this year, ...

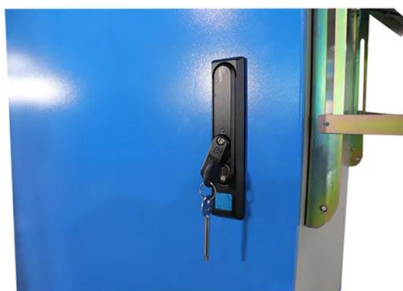

China's clean technology exports hit record high in August, reaching

China's clean technology exports hit record high in August, reaching \$20bn The new record has been reached amid strong growth in EV and battery exports in 2025, half of which has come from ...

How mega batteries are unlocking an energy revolution

The US and China dominate the market, accounting for about 70 per cent of projects by power capacity. Batteries are also playing a growing role in Australia and the UK and countries from ...

China to scrap export tax rebates for photovoltaic and battery products

BEIJING, Jan 9 (Reuters) - China will cancel value-added tax export rebates for photovoltaic products from April 1, the finance ministry said in a joint statement with the State Taxation

Maguire: China's battery exports are at new heights.

China's battery exporters are enjoying rapid growth in a number of countries outside of those noted above. These markets will continue to be a lucrative market for battery sellers.
