

# Cologne business park has liquid solar container

## Overview

---

Koelnmesse has announced that it has started operating what it describes as the largest inner-city photovoltaic project in Cologne, Germany. One of the city's largest photovoltaic plants is to be built in Cologne-Dünnwald, which will not only set new standards in local energy supply but also serve as a model for the energy transition in urban areas. The Rheinenergie project impressively demonstrates how ambitious climate protection. COLOGNE, Germany, July 6, 2023 - Ford has taken a significant step on its Road to Better plan for improved sustainability after signing a Memorandum of Understanding to develop an action plan for climate protection with German energy provider RheinEnergie. The "Liquid Cooled Energy Storage Solution Market" is expected to reach USD xx. Some 500 photovoltaic modules are being added to the roof of the newly-opened Confex venue, while a system totalling 4,800 modules is being added to the roof. With 4,800 modules, it promises an annual yield of around two million kilowatt hours (kWh). Chemiepark Knapsack offers companies a scale-up platform and access to know-how for many kinds of process industries as well as integration into existing value chains.
