

# Colombia s shared solar container policy adjustment plan

## Overview

---

The program, known as Colombia Solar, will be deployed between 2026 and 2030 and pursues three clear goals: to relieve pressure on the Solidarity Fund for Subsidies and Income Redistribution (FSSRI), guarantee basic subsistence consumption in strata 1, 2 and 3 and accelerate a. Colombia's energy transition policy making is an inspiring example of a fossil fuel producing country committed to climate action, based on a long-term decarbonisation pathway and a policy of energy and economic diversification and a just transition. Colombia's pathway to a clean energy future hinges on a dramatic scale-up of renewable generation. National estimates suggest that between 2023 and 2052, installed capacity in solar and wind must expand by 40 to 150 times to align with energy and climate goals. • In En Colombia, Colombia, installed la capacidad solar instalada and wind solar capacity y eólica represented representó around alrededor 9% of del the 9% total de la electricity matriz eléctrica matrix total in 2024, en 2024, a significant un avance increase frente al from 1,5% the registrado. Did you know Colombia's government subsidy for solar panels containers could cut your commercial energy bills by 45% by 2026?

With rising electricity tariffs and climate pledges, Colombia now offers up to 30% reimbursement for solar container systems – a game-changer for factories, hotels, and.
