

Colombia shared solar container power station bidding

Overview

In January, the government launched a bidding process for Colombia's first grid-scale energy storage project as part of broader efforts to reinforce electricity supply on the Caribbean coast. This working paper examines how Colombia's renewable energy auctions can foster a just and inclusive energy transition by integrating socio-economic and community-driven objectives. The International Renewable Energy Agency (IRENA) serves as the principal platform for international co-operation, a centre of excellence, a repository of policy, technology, resource and financial knowledge, and a driver of action on the ground to advance the transformation of the global energy. With Blackridge Research's Global Project Tracking (GPT) platform, you can identify the right opportunities and grow your pipeline while saving precious time and money doing it. Free! No Strings Attached Find the Latest Solar Photovoltaic (PV) Projects in Colombia with Ease.
