

Danish inter-seasonal solar container kroner

Overview

Denmark's carbon tax (750 DKK/ton CO₂ in 2025) and guaranteed 20-year feed-in tariffs make solar panel container projects irresistible. For factories, farms, or cold storage facilities, a 500 kW system now costs €1. The report defines energy storage as:

- o Man-made (artificial) to provide about 15,000 MW of cold for periods of up to several months.

Underground thermal energy storage (UTES) [20e23] is a system that uses inter-seasonal heat storage, storing excess heat (e.g., from industrial processes or solar). That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar.
