

Do solar container engineers need to take certification now

Overview

Associate degree, specific solar training, licensure and certification required as well as three to five years of experience in the skilled trades. NABCEP maintains an online Associate Directory, which can be used to verify an individual's type of credential, credential number, and expiration date. Say that you do need to take the exam all three times over the course of the 12 months to get the exam result that you are after - you don't need to stick to a Engineer-In-Training certification Once you pass the FE exam and upon graduation, you are eligible to apply for an Engineer-In-Training. Here you will find resources, including certification information, our training program structure, tuition and scholarship information, and other commonly asked questions. If you have questions that are not found here in the SEI Student Support Portal or would like to speak with a Student Services. Training can take many forms based on the target audience and topic area, such as a high school career technical education (CTE) program, an undergraduate or graduate degree.
