

# Does the industrial park have solar container

## Overview

---

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Developed, owned, and now operated by Arevon, the two-phase Eland Solar-plus-Storage Project is capable of supplying 7% of Los Angeles's electricity — energizing and bolstering the grid for a city whose influence reaches every screen and every stream. It is planned to build the world's first 1GW perovskite Photovoltaic production line, 100-ton perovskite quantum dot production line, R&D innovation center, and headquarters building. Be the only tenant in a 78,350-SF freestanding Class A industrial building with 30-foot clear heights and 90% warehouse and 10% office build-out. 2360 Boswell Road has 1,600-amp, 277/480-volt, 3-phase power, and a 109-kW rooftop solar system for high-energy capacity and efficiency. Solar micro-grids are autonomous energy systems that operate on a localised basis and are capable of generating, storing and distributing solar energy independently or in conjunction with the main electricity grid.
