

# Electric vehicle solar container clean solar container assistance

## Overview

---

Find information on credits for used clean vehicles, qualified commercial clean vehicles and new plug-in EVs purchased before 2023. Not only are electric cars cleaner, but they offer a cutting-edge driving experience, save money on fuel, and require less maintenance than cars with gas or diesel engines. Nearly 79,000 new electric vehicles (EVs) hit the road in New York State in 2023, supported by a growing network of EV. If you're interested in installing a residential EV charging station at your home, we're here to help. PV modules like solar panels and shingles convert sunlight to direct current electricity using photovoltaic cells. Charging your EV with solar lets you power your commute with free, clean sunlight.
