

Enterprise self-use solar container policy

Overview

This guide provides a clear framework for leveraging solar-plus-storage systems to not only meet but exceed RPS compliance goals, turning a regulatory requirement into a strategic asset. Policymakers have two primary strategies for increasing self-sufficiency in the PV supply chain, namely, limiting the availability of foreign products and introducing supportive measures. A solar-powered container can run lighting, sound systems, medical equipment or communications gear without waiting for grid hookups. Off-grid living and clinics: Even homes and clinics have been built from shipping containers. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. The Enterprise Solar Storage Project, as proposed by Enterprise Solar Storage, LLC, is for the construction and operation of a photovoltaic (PV) solar facility and associated infrastructure necessary to generate 600 megawatts (MW) of renewable electrical energy with up to 4,000 megawatt-hours (MWh).
