

European solar container offsets electric vehicles

Overview

European Commission President Ursula von der Leyen has announced an anti-subsidy inquiry into imports of Chinese electric cars and support for the wind sector to keep these technologies in Europe. Europe's appetite for affordable, well-equipped electric vehicles is reshaping global trade lanes. Shipping electric vehicles from China to Europe has evolved from a niche logistics challenge into a massive, strategic freight flow driven by China's dominance as the world's EV factory, record export. This followed the imposition of more stringent measures by the United States and Canada.

European solar container offsets electric vehicles

How Chinese EV Logistics are Shifting Across Europe

The European Commission has published a guidance document for Chinese exporters of battery electric vehicles (BEV), to replace existing import tariffs with a minimum price mechanism. ...
