

Finland pumped storage power station

Overview

We are planning a pumped storage hydropower station with a capacity of approximately 500 megawatts (MW) in Kemijärvi, Northern Finland, which would enable electricity storage for up to a week. New hydroelectricity accelerates Finland's energy transition and secures the uninterrupted flow of society's everyday life. Roschier is advising Kemijoki in the development and permitting of pumped storage hydropower plants.

Finland pumped storage power station

Pumped storage power plants

Pumped storage power plants reduce the price of electricity for Finnish users - for households, companies and industries alike. They also stabilise fluctuations in electricity prices and improve the ...
