

# German solar container power

## Overview

---

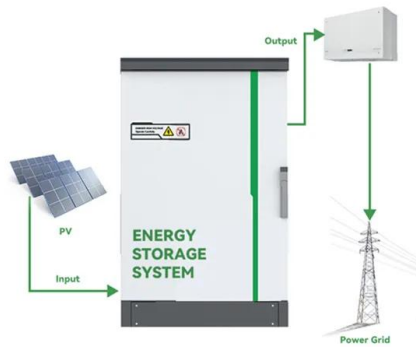

Why are German businesses racing to adopt mobile solar container projects?

With industrial electricity prices hitting €0.28/kWh and rising – 45% above the EU average – these plug-and-play systems deliver immediate ROI while dodging grid dependency. Solarfold allows you to generate electricity where it's needed, and where it pays to do so. Small solar devices that can be plugged into household sockets are growing ever more popular in the country, with more than 1 million installed in the past three years. It effectively includes the entire set of required components in standard shipping containers – 6ft, 10ft, 20ft or 40ft, according to client requirements.
