

Haimu has good solar container and good air quality

Overview

My off-grid container has the same specs: two cameras, cellular wifi, portable heater, portable AC, and LED string lights. I am trying to build a solar powered container unit of 8x8x16 that will be temperature and probably humidity controlled for interior temps above 80 degrees and humidity above 30%. Located in the Southern California Desert temperatures are on the warm side especially from May to October (90-120F ambient, +10-15 degrees inside the container. Let's face it - if you're reading about Haimu energy storage boilers, you're probably either a facility manager drowning in heating bills, a sustainability officer chasing carbon targets, or a tech enthusiast obsessed with energy innovations.

Haimu has good solar container and good air quality

The hot water project of Jiangmen School chooses Haimu Sunshine ...

The Haimu Sunshine air-energy heat pump uses 80% of the heat in the air to heat through the air compression process, which effectively improves the heating effect of the equipment and saves ...

HAIMU INSTALLATION TUTORIAL

While solar panels soak up the spotlight and wind turbines strike dramatic poses, these silent workhorses ensure your Netflix binge doesn't black out when clouds roll in. But here's the kicker: not ...
