

How long does it take for a household solar container battery to last

Overview

On average, 5 to 15 years—depending on the battery type, usage habits, and maintenance. When people talk about how long a solar battery lasts, people can mean two different things: Cycle life A cycle means one full charge and one full discharge. Your home battery is not going to live forever, but it might last longer than you think. A battery's lifespan is about half as long as solar panels usually last, so you'll have to replace your battery well before your panels come to the end of their useful lifespan.

How long does it take for a household solar container battery to last
