

How long does it take to build an solar container

Overview

How long does it take to manufacture and deliver a mobile PV container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. The exact duration depends on key factors such as design complexity, permits, site conditions, and material availability. This stage typically encompasses tasks such as budget allocation, initial design. Therefore, you need to ask yourself: do I want to spend months building, or move in within weeks?
