

How long is the warranty period for the solar container board

Overview

The duration of coverage differs based on the brand and product, but the solar industry typically offers warranties of 10 years or longer. As a minimum requirement, it's advised to seek a warranty providing coverage against panel failure for at least a decade. While many home appliances typically come with a basic warranty offering free replacements within a specified period, solar panels are protected by various types of warranties that cover a range of potential issues. A standard solar panel warranty should come with at least 10 years of protection, though many premium options now offer 25 or even 30+ years of coverage. A Solar Panel Warranty typically consists of two parts: the Product Warranty (10–25 years) covering manufacturing defects, and the Performance Warranty (25–30 years) guaranteeing 80–90% power output.
