

How long will solar container companies be restricted

Overview

When you Safe Harbor in 2025, your project is protected until the end of 2029. If you wait until 2026, that extends to 2030, but by then, FEOC rules will already be in force. A major change is coming for commercial solar projects — and it could determine whether your company qualifies for the federal 30% Investment Tax Credit (ITC) for solar or loses it entirely. Tariffs, foreign content restrictions, and antidumping and countervailing duty investigations have reshaped the landscape for imports of solar components and manufactured products. Image: Wikimedia Commons /Wayback Machine From pv magazine RE+ Special Edition Imports are a huge. The US Department of Commerce (Commerce) is currently conducting circumvention inquiries to determine whether imports of crystalline silicon photovoltaic cells, whether assembled into modules or not, which are completed in Cambodia, Malaysia, Thailand, or Vietnam using parts and components.

How long will solar container companies be restricted

A tightened U.S. solar trade environment - pv magazine USA

Solar projects that start construction in 2026 must contain 40% content with no "material assistance," increasing over time to 60% for projects starting construction after 2029.
