

# How many inverters does the solar container device have

## Overview

---

The container integrates 196 photovoltaic modules that can be electrically deployed and retracted in less than 30 minutes. The aluminum rail system, both lightweight and environmentally friendly, ensures a mobile solution with rapid commissioning. Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. A solar combiner box is a crucial component in solar energy systems, designed to consolidate the outputs of multiple solar panel strings into a single output that connects to an inverter.

## What is a Solar Container and How Does It Work?

They are equipped with solar panels, batteries, and inverters, all packed into a standard shipping container. This design not only facilitates transport but also allows for quick deployment.

## Solar container Solarfold motorized , ECOSUN innovations

Size of the deployed container : width 6 x length 125 meters  
Lenght of the deployed solar plant : 130m - on flat ground  
Weight of full container with PV and inverters : 13,5 tons
