

# How much does a solar container fire fighting system cost

## Overview

---

Each system, including 5 kW panels, a 10 kWh lithium battery bank, and real-time remote monitoring, cost around USD \$25,000, including shipping and installation. A properly designed extinguishing system typically represents 8-15% of total container costs, but prevents catastrophic losses exceeding \$2 million per incident. Fire suppression costs vary widely based on system type, protected area size, and specific property requirements. Let's break down what really goes into the cost and whether it's worth your money. Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh.
