

Is the national advanced solar container materials center a state-owned enterprise

Overview

In less than 5 years, we've become a governmentally recognized advanced nuclear development company leading the nation in the design and deployment of liquid-fueled molten salt reactors to power the next generation of nuclear energy. This is one of a series of reports and deep dive assessments produced in response to Executive Order 14017 "America's Supply Chains," which directs the Secretary of Energy to submit a report on supply chains for the energy sector industrial base. Government-owned companies, usually called state-owned enterprises (SOE s), tend to be industry specific. Some countries have one focused on mineral extraction and another for oil and gas usually called a national oil company (NOC). Acquisition means the acquiring by contract with appropriated funds of supplies or services (including construction) by and for the use of the Federal Government through purchase or lease, whether the supplies or services are already in existence or must be created, developed, demonstrated, and. Register your entity or get a Unique Entity ID to get started doing business with the federal government.
