

Jiayuan technology invests in solar container

Overview

The article emphasizes the broad prospects of the photovoltaic module recycling market, pointing out that its main sources include: scrapped modules in the production process, natural disasters such as Super Typhoon Yagi (No. Jiayuan Technology intends to set up a new energy technology company to cut into new energy photovoltaic energy storage new business. The recycled silicon materials manufactured by RESOLAR have significant advantages. , founded in September 2001, is a comprehensive technology-based conglomerate specializing in research, manufacturing, and sales of high-performance electrolytic copper foil, composite copper foil, high-performance and high-precision copper alloy wire and rod. [CATL invests over 66 billion yuan to lock in Jiayuan Technology's battery materials] On November 5th, Jiayuan Technology announced the signing of a "Cooperation Framework Agreement" with CATL. According to the agreement, CATL will purchase no less than 626000 tons of lithium battery copper foil. In the contemporary energy landscape, the solar container has emerged as a significant and evolving innovation, gradually shaping the future of energy supply and utilization.

Jiayuan technology invests in solar container

LIQUID COOLING ENERGY STORAGE SYSTEM

EMS real-time monitoring
No container design
flexible site layout

Cycle Life
≥8000

Nominal Energy
200kwh

IP Grade
IP55
