

# Latest overseas home solar container battery policies

## Overview

---

This report synthesizes the latest regulatory mandates from the IMO and IMDG Code with the practical and risk-focused guidance provided by IUMI, offering a comprehensive overview for all stakeholders involved in the supply chain. Home batteries are becoming increasingly popular, but as with any new home utility, there come risks. After all, a large capacity battery can present great danger if not installed or used correctly. In the face of these dangers, authorities in jurisdictions around the world have been working to. The rapid global adoption of electric vehicles (EVs), lithium-ion batteries, and Battery Energy Storage Systems (BESS) has led to significant advancements in maritime transport regulations and best practices. For batteries to realise their potential to contribute, policy makers need to establish effective frameworks for market access, ensure fair competition among technologies, and recognise the varied contributions that batteries make to sustainability, security and affordability of energy.

## Latest overseas home solar container battery policies

---
