

# Lithuania solar container battery air transport power requirements

## Overview

---

Lithium metal batteries packed by themselves (not contained in or packed with equipment) (Packing Instruction 968) are forbidden for transport as cargo on passenger aircraft). The international air transport of lithium batteries and power banks isn't universally prohibited, but requires compliance with stringent safety standards and regulatory requirements. This article examines the feasibility conditions, core certification requirements, and additional compliance. Shippers should contact their carrier or freight forwarder to confirm if special approvals and. But there's good news: Lithium-ion batteries can be shipped safely by air if shippers take proper precautions.
