

Overview

A California neighborhood where blackouts vanish like morning fog, and businesses slash energy bills while sipping organic almond milk lattes. That's the reality taking shape in Monrovia's user-side energy storage project - a \$33 billion global industry's poster child for smarter. Hosts described the project as a rooftop solar field on the covered reservoir near. LIWP is the only program of its kind in California that focuses exclusively on serving low-income households with solar. Starting in March 2024, homes and businesses will transition to CPA service and automatically receive clean, competitively priced energy from CPA. 16 introduced an ordinance to adopt the 2025 edition of the California Building Standards Code (Title 24) with a set of local administrative and fire-hardening amendments permitted under AB 130, and set a public hearing for Jan. This 300-acre facility isn't just another industrial complex; it's the equivalent of a giant "charging bank" for California's power grid, storing enough electricity to power 150,000 homes during peak.
