## Overview

---

Muscat: Oman has signed a milestone agreement to develop its first large-scale solar power and battery storage facility, marking a decisive step in the Sultanate's renewable energy transition and long-term sustainability agenda. Its sole energy sources are crude oil supplying renewable energy to large consumers through direct expected to become among top 10 H2 exporters by 2030 according to 1. Battery storage allows solar power plants to store excess energy generated during the day for use at night or when demand is higher. This 500MW facility isn't just another battery farm; it's like a giant power bank where businesses can "rent" storage space, preventing energy waste equivalent to powering 150,000 homes annually [1].
