

# National solar container industrial park list

## Overview

---

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. Solar Photovoltaic Manufacturing Map shows only active manufacturing sites that contribute to the solar photovoltaic supply chain. It details their nameplate capacities, or the full amount of potential output at an existing facility, where known. There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. Nearly 3,700 facilities and their attributes can be seen on and downloaded from the interactive map RESTON, Va. These facilities represent the backbone of America's renewable energy transition—spanning deserts.
