

# Ndrc issues new solar container

## Overview

---

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. According to Wechat Official Account @escn518, in the short four months of 2025, a series of new policies have been successively released at the national and local levels, ushering in an unprecedented "policy storm" for China's new energy industry and accelerating the transformation of the energy. These regulations aren't just bureaucratic paperwork - they're reshaping how we store solar power for cloudy days and wind energy for calm nights [3]. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. Over the past few days, we've seen a series of policy moves and project signals from China and key international markets that will shape solar PV development and financing into 2025. Grid-tied solar systems are connected to the local power grid, allowing users to sell excess energy back to the grid.

## China to halt subsidies for some types of wind, solar projects: NDRC

China's central government will halt subsidies for some types of renewables, including new onshore wind projects, concentrated solar photovoltaic power plants and distributed solar photovoltaic ...

### DETAILS AND PACKAGING

- 1 USER MANUAL PDF
- 2 RJ45 Cable For RS485/CAN
- 3 Battery in Parallel Cables
- 4 RJ45 TO USB Monitor Cable
- 5 M8 Terminal\*4
