## Overview

---

Mount high-efficiency solar panels on the container roof or adjacent racks and charge a battery bank to supply power. For example, BoxPower's 20-foot SolarContainer can hold 4-60 kW of PV on its roof – enough for heavy-duty loads. When the grid is hundreds of feet away (or non-existent), a self-contained power solution is ideal. How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres. Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more).
