

Port of Spain solar container welding production

Overview

The project, which began in December 2024, will see 1,674 solar panels installed on various rooftops in the terminal. This will include 502 panels with a nominal power of 655 watts each, and an additional 1,172 panels rated at 575 watts. An entrepreneur planning a new solar module factory often focuses on the most visible elements, like state-of-the-art machinery, building layout, and initial investment figures. While these are undoubtedly critical, a project's profitability can hinge on an often-underestimated factor: logistics.
