

# Power grid solar container system epc operation mode

## Overview

---

Below, we explore the key operational modes of PCS and their role in the ESS ecosystem. EPC's inverters are designed for the energy storage and PV market and include advanced functionality as standard, that enable participation in grid ancillary services like frequency regulation, voltage control and black start, with leading response time. Contracts are the most common form of contract used to undertake construction works on utility-scale solar projects by the private sector. Meet your project's requirements with PCS power ratings ranging from 500 kW to 2,000kW and capacities ranging from 2,150kWh to. Solar energy continues to gain momentum as one of the most promising renewable energy sources.

### Home Energy Storage (Stackable system)

- Product Introduction**
- Scalable from 10 kWh to 50 kWh
  - Self-Consumption Optimizer
  - Integrated with inverter to avoid the compatibility problem
  - LFP battery, safest and long cycle life
  - Stackable design for easy installation
  - Capable of High-Powered Emergency-Backup and Off-Grid Function

48V 100Ah
