

# Project investment in electrical engineers for solar container

## Overview

---

Here are 100 unique solar-based project ideas for engineering students, focusing on innovative applications and advancements in solar technology. Electrical integration in shipping container projects refers to the process of safely and efficiently installing electrical systems—such as wiring, outlets, lighting, and circuit panels—within modified shipping containers. Shipping container solar systems are transforming the way remote projects are powered. The project supports PNCT’s mission toward a net-zero energy microgrid and PANYNJ’s commitment to reaching net-zero carbon emissions by 2050.
