

Pump truck concrete solar container device

Overview

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. This severe-duty truck is designed to perform at a higher level than your average pump truck. The concrete pump truck serves as a technology utilized for transporting newly mixed concrete in liquid form from containers or batching features to construction projects where the concrete needs to be poured or supplied.

Pump truck concrete solar container device
