

Shared solar container policy summary

Overview

They allow subscribers to purchase “shares” of the solar system’s electricity output over a set time, which provides credits on the subscribers’ monthly bill, thereby permitting customers to meet some or all their electricity needs with solar energy. Shared solar projects allow customers that do not have sufficient solar resource, that rent their homes, or that are otherwise unable or unwilling to install solar on their residences, to buy or lease a portion of a shared solar system. we’d see over 28 GW of additional solar capacity! But what about valuation?

Who could administer a program?

Ownership directly affects financing—who. The demand for renewable energy solutions is at an all-time high, and solar containers have emerged as a leading innovation for sustainable The Shanghai Municipal Government announces measures and policies to support the development of small and medium-sized enterprises at a press conference held. ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
