

# Shenghuo solar container new energy

## Overview

---

The container is equipped with foldable high-efficiency solar panels, holding 168–336 panels that deliver 50–168 kWp of power. It is the perfect alternative to unstable grid power and diesel generators, keeping operations running even in remote areas or where infrastructure is. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. As energy challenges grow, our solar container solution was created to meet the need. It provides clean, efficient power wherever you need it and can also generate profit. Last December China's state-owned oil company, Sinopec, recapped the results of a modestly scaled floating solar pilot project, aimed at producing green hydrogen from seawater.
