

Overview

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025. Source: PV Magazine LATAM [pdf] Costs range from €450–€650 per kWh for lithium-ion systems. But this range hides much nuance—anything from battery chemistry to cooling systems to permits and integration. Container energy storage is an integrated energy storage solution that encapsulates high-capacity storage batteries into a container. Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh.
