

# Solar container battery pure lithium new energy

## Overview

---

Lithium solar batteries are rechargeable energy storage systems that use lithium-ion chemistry to store electricity generated by solar panels for later use. Here's what makes them the top choice for modern solar installations:

**Key Benefits:** The battery revolution is real. Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Lithium-ion battery manufacturer CATL has launched its latest grid-scale BESS product, with 6.25MWh per 20-foot container and zero degradation over the first five years, the company claimed.
