

# Solar container battery testing field

## Overview

---

When it comes to ensuring the quality, performance, and reliability of energy storage battery systems, two critical phases stand out: Factory Acceptance Testing (FAT) and Site Acceptance Testing (SAT). Container-level testing becomes a critical step in production, providing essential quality risk control to guarantee safe, reliable performance in the field. Intertek CEA's proactive and robust quality control and testing program utilizes our strong QA storage background and experienced professionals to proactively identify and resolve issues at every stage of production - before they impact your business. We can also conduct an evaluation in the field or at a manufacturing location if required. Navy, we put our high safety standards into practice with a battery storage container field test.
