

Solar container electrical cabinet manufacturer

Overview

, has long specialized in delivering turnkey solar systems — including solar panels, inverters, and battery storage installations — to both commercial and residential clients. Battery enclosures/cabinets that provide storage, security and reliable, warrantied long term sustainability. Our company has the design and production capacity of UPS power supply, PCS power supply, off-grid photovoltaic inverter, and off-grid photovoltaic. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. SOFAR Energy Storage Cabinet adopts a modular design and supports flexible expansion of AC and DC capacity; the maximum parallel power of 6 cabinets on the AC side covers 215kW-1290kW; the capacity of 3 battery cabinets can be added on the DC side, and the capacity expansion covers 2-8 hours.
