

Solar container fan manufacturer

Overview

Keep your container cool, dry, and mold-free with our specialized solar-powered vent, engineered to fit perfectly on the corrugated roof of standard shipping containers. This smart, self-powered fan system uses solar energy to actively remove hot, moist air—protecting your contents from heat. We have taken our very popular Solar RoofBlaster vent/fan unit and designed a special form-fitting flashing that will sit flush on top of a Conex shipping container! So we now offer not only a solar tube lighting solution for your Conex® shipping container, but we also provide a ventilation. Adjustable solar panel maximizes energy absorption, running 24/7 (12h after sunset) for zero electricity costs

- 90% Condensation Reduction & 20°C.

Solar container fan manufacturer
