

Solar container future app cannot be logged in

Overview

Deploying a containerized application to Azure Container Apps for the first time can sometimes result in the app failing to start. Use this guide to figure out how to diagnose and fix common issues when your container doesn't start. When I try to open the service, it either gets stuck on an infinite loading screen or eventually shows repeated errors like: The request timed out. Diagnostic information: timestamp '20250715T191908Z', subscription id '', tracking id '<>', request correlation id '<>'.

Efficient Higher Revenue

- Max. Efficiency 97.2%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Surge SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. Surge Inverter Thermal
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
