

Solar container investment fell 81

Overview

In the first quarter of 2025, global corporate funding for solar companies fell dramatically, with a staggering 41% year-over-year decrease. Energy storage companies faced an even more severe decline of 81%, according to data from Mercom Capital Group. There are now 262 gigawatts direct-current of solar capacity installed nationwide, enough to power 45 million homes. In the last decade, solar deployments have experienced an average annual growth rate of 28%. Abu Dhabi, United Arab Emirates / New York, United States of America, 24 September 2024 - Renewables remain competitive despite fossil fuel prices returning closer to historical cost levels, concludes Renewable Power Generation Costs in 2023, released by the International Renewable Energy Agency. IRENA reports that, between 2010 and 2023, the global weighted average levelized cost of energy (LCOE) of concentrating solar power (CSP) fell from \$0.
