

Solar container spot welding pen test

Overview

When the foot pedal or pen is pressed, power is sent to the solenoid, closing the main circuit on the large wires for the weld. Is easy to test, just push the pedal, or push the pen on a non conductive surface (ie wood or plastic) and you will hear the big solenoid click into action. Unweld Condition - Twice as many echoes appear on display and there is a long ring-down time. The flexible nature of the rubber can identify defecti ore has a high sound attenuation characteristic.
