

# Solar container station operation and maintenance requirements

## Overview

---

Explore essential maintenance practices for optimizing solar battery storage systems, including visual inspections, corrosion cleaning, cycle monitoring, and more. Enhance battery lifespan and performance with comprehensive guidelines and smart tools. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. NFPA 70E requires that electrical equipment be properly maintained, and following NFPA 70B is an excellent way to comply. After solar energy arrays are installed, they must undergo operations and maintenance (O&M) to function properly and meet energy production targets over the lifecycle of the solar system and extend its life. This capacity-building manual was developed as part of the SESA project – Smart Energy Solution for Africa, funded by Research & Innovation.
