

Solar container system control products

Overview

A solar system container is a modular, transportable power solution that integrates solar panels, batteries, inverters, and control systems into a durable shipping container. These units provide reliable off-grid or emergency electricity in remote, temporary, or infrastructure-limited. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Flexible financing and low monthly lease options can help you secure the best price for your solar system. Discover our vision for powering the future of energy through cutting-edge solar solutions. Energy density, which refers to solar storage density, indicates how much energy a battery or system can hold.
